

DOOR SENSOR OD V.1.01 _

Door opening control sensor uses the LoraWan network to transmit messages and is designed to remotely control the opening of the door.

The sensor board is protected by a sealed plastic case, which is equipped with a tamper sensor and a displacement sensor.

Options	Meaning
Operating frequency ranges	RU864-868 EU863-870 KZ865-868
Operating temperature range, °C	- 40...+85
Overall dimensions, mm	70x 6 0x30
Weight, g	120
Degree of protection	IP67
Life time	At least 10 years
Battery operation	At least 6 years

Web interface

A convenient door opening monitoring interface that allows you to display: whether the sensor is connected or not, alarm events, case opening, signal level, etc. On the map, you can display all the doors or in layers, depending on the events.

When installing the sensor, it is enough to point the smartphone camera at the QR code of the sensor and the page with the current sensor signal level will be displayed in the browser, as well as an invitation to enter information about the location of the door. The sensor will automatically appear in the monitoring system.
