

MOTION SENSOR MD V.1.02 _

The motion sensor uses the LoraWan network to send messages.

The sensor board is protected by a sealed plastic case, which is equipped with a tamper sensor and a displacement sensor.

Options	Meaning
Operating frequency ranges	RU864-868 EU863-870 KZ865-868
Operating temperature range, °C	- 40...+85
Overall dimensions, mm	70x60x40,
Weight, g	120
Degree of protection	IP67
Life time	At least 10 years
Battery operation	At least 6 years

Web interface

Датчик движения №4553000000000024	
Дата установки: 21.12.2020	
Текущее состояние: Включено	
Текущее состояние тревоги: OK	
Дата	Состояние
08.04.2021 08:31:25	Снятие с тревоги
08.04.2021 08:30:47	Снятие с тревоги
08.04.2021 08:26:22	Тревога (датчик сработал)
08.04.2021 08:16:22	Тревога (датчик сработал)
08.04.2021 08:06:22	Тревога (датчик сработал)
08.04.2021 07:59:06	Тревога (датчик сработал)
08.04.2021 07:59:00	Плановый выход на связь
08.04.2021 07:56:22	Тревога (датчик сработал)
08.04.2021 07:46:22	Тревога (датчик сработал)

A convenient motion control interface that allows you to display: whether the sensor is connected or not, alarm events, case opening, signal level, etc. On the map, you can display all motion sensors or in layers, depending on the events.

When installing the sensor, it is enough to point the smartphone camera at the QR code of the sensor and the page with the current signal level of the sensor will be displayed in the browser, as well as an invitation to enter information about the location of the sensor. The sensor will automatically appear in the monitoring system.

The image shows a web interface titled "IoT Manager". It contains a form with the following fields and values:

Field	Value
Идентификатор	4553000000000006
Уровень сигнала	-110.0
Город	Київ
Улиця	вул. Банкова
Номер будинку	9

At the bottom right of the form is a green button labeled "Зберегти".
